Professional Summary

Full-Stack Developer with hands-on experience architecting and deploying scalable web, e-commerce, and enterprise applications. Built production systems using Java (Jakarta EE), Python, PHP, JavaScript, React, Next.js, and MySQL. Spearheaded the architecture of SPAS, a 5-component decision-support platform integrating JavaFX, React, and a Python ML microservice. Skilled in API design, performance optimization, and integrating machine learning workflows into modern web applications.

Core Competencies & Skills

- **Project & Workflow Management:** Agile/Scrum, Time & Resource Management, Task Prioritization, ClickUp, Requirement Analysis, Technical Documentation
- **Frontend Development:** JavaScript (ES6+), React, Next.js, Vite, HTML5, CSS3, Tailwind CSS
- **Backend & Databases:** Node.js, Express, PHP, Java (Jakarta REST/JPA), Python, GlassFish, MySQL, MongoDB, REST APIs
- **Mobile & E-commerce:** Flutter, Dart, Firebase, WordPress, WooCommerce
- **DevOps & Tools:** Git/GitHub, Vercel, Railway, Figma, Postman

Featured Technical Projects

1. SPAS (Sales Predictive Analytics System) | Jakarta EE, React, JavaFX, Python (ML), MySQL | Aug 2026

- Spearheaded the end-to-end architecture of a 5-component decision-support platform integrating a Jakarta EE REST API, React and JavaFX clients, and a Python ML microservice.
- Designed a secure Jakarta EE 10/GlassFish backend with JWT authentication, role-based access filters, and a 19-table MySQL schema.
- Built and deployed two scikit-learn ML models via FastAPI for an activity-outcome classifier and a sales-target forecaster; integrated server-to-server for real-time predictions.
- Migrated the React Sales Executive Portal from mock data to a fully live backend integration.

2. Online Reservation System | Java, Jakarta REST, JPA, MySQL, GlassFish | Mar 2026

- Led the full-stack architectural design and implementation of RESTful web services using Jakarta REST and JPA for object-relational mapping.
- Engineered a custom validation engine utilizing regex-based rules and custom strategies to maintain high data integrity.
- Integrated HikariCP for connection pooling and automated deployment via Maven on GlassFish Server 7.0.

3. Dynamic E-Commerce System | WordPress, OOP PHP, MySQL, REST API | Dec 2025

- Architected a responsive frontend and secure MVC backend with payment gateway and inventory API integrations.
- Optimized system performance through asset minification, caching, and lazy loading, achieving an 80% reduction in page load times and significantly boosting conversion.

4. Restaurant Management Web Application | PHP, MySQL, Session Security | Aug 2025

- Developed a full-stack platform for menu, event, and reservation management, automating administrative workflows.
- Enforced role-based access control (RBAC) via PHP sessions and PDO and created initial interactive UI/UX prototypes in Figma.

5. E-Commerce Platform for Handcrafted Items | MERN Stack, Java | Apr 2025

- Designed and deployed a complete art gallery e-commerce application featuring intuitive catalog navigation and secure cart management.

Education

- Full-Stack Web Developer Industrial Training Program | DoMedia - Malabe | 2025
- BSc (Hons) in Software Engineering | Cardiff Metropolitan University - UK | 2026
- Higher Diploma in Software Engineering | Cardiff Metropolitan University - UK | 2023-2025
- G.C.E. (A/L) Combined Mathematics | Asoka Vidyalaya | Colombo - 10
- G.C.E. (O/L) | 5 As, 3 Bs, 1 C | Asoka Vidyalaya | Colombo - 10
